

White Mountain Chapter BMWCCA Mission Statement and operational goals

The DEC's mission is to provide our members with the opportunity to meet and enjoy other like-minded enthusiasts---and their favorite marque---and to improve the participant's enjoyment of---and education in---their ultimate driving machines.

The DEC is the governing body for WMC driving events. WMC's goal is to be Northern New England's leader in driving-education events and promote BMWCCA Club racing. Driver education events include Advanced Driving Safety Skills (ADSS), Street Survival (teen driving skills) and track events (high-performance driving schools and Club races). Our Instructor Development Program will maintain its standards of excellence to provide the highest quality of instructors for these events.

While maintaining a BMW focus, WMC will heartily welcome drivers of other car makes and other clubs. It will work cooperatively and may share events with other clubs. WMC's highest priorities are safety, fun, social togetherness and the teaching of technical excellence in the skills of high-performance driving and driver safety. Track events are not race schools.

The DEC will maintain a policy of open meetings and communication. It will strive to maintain a wide circle of interested and committed members and foster relationships with other clubs. The DEC will work cooperatively and responsibly with the WMC Board of Directors and Social Events Committee. It will respond to the needs of its sponsors. Above all it exists to serve the membership of the White Mountain Chapter in specific and the driver education community of Northern New England in large.
